

LED Lighting – Warehouse/Trampoline Park

Sky Zone Trampoline Park upgrades to LED

Company Profile:

Sky Zone Trampoline Park converted their HighBay light fixtures with LED RetroKits, Installing tube lights as well.

Project Description:

Sky Zone Fort Lauderdale previously had 62 unreachable HighBay light fixtures, each containing a 400 watt metal halide bulb. Due to Michrotech's rope access team and 120 watt LED Retro Kits, the existing fixtures were able to be reached and therefore converted, reducing initial project cost significantly. As a result of the LED conversion this location has experienced an energy reduction of 70% on the lighting. The premises are now safer and more well lit, giving the customer a better overall experience.

Previous Annual Energy Cost: \$11,866.30
Current Annual Operating Cost: \$3,541.67
Annual Savings: \$8,324.63

PREVIOUS

CURRENT

“By Retrofitting the HighBays to LED and replacing legacy tubes with LED, Sky Zone benefited from a savings of \$8,324.63 annually.”
